Address : Feni, Bangladesh

SUMMARY

Motivated and detail-oriented entry-level backend developer with a solid foundation in Python, Django, and Django REST Framework (DRF). Skilled in designing and building RESTful APIs, managing databases, and developing efficient server-side logic for dynamic web applications. Familiar with front-end technologies such as HTML, CSS, Tailwind CSS, and React, allowing smooth integration between front-end and back-end components. Experienced with MySQL and version control using Git. Passionate about learning modern backend technologies, writing clean and maintainable code, and contributing to the development of scalable and reliable web solutions.

PROJECTS

E-Manager — Role-Based Event Management System | [Code](#)
Django, SQLite/PostgreSQL, Tailwind CSS
- Built a role-based event management system with Admin, Organizer, and Participant roles.
- Implemented secure authentication, access control, and email notifications using Django.
- Developed event creation, RSVP, and category management features.
- Designed a clean, responsive frontend with HTML, CSS, and Tailwind CSS.
- Integrated email notification system for user registration and RSVP confirmations.

User Authentication API | [Code](#)
Django REST Framework, JWT, Email OTP
- Built RESTful authentication APIs with JWT for login/logout.
- Implemented email OTP verification: user registers → receives OTP → verifies via email-verify endpoint to activate account.
- Exposed /users endpoint showing only active users; protected by authentication.
- Allowed profile update only for the authenticated owner; others have read-only access.

PhiMart | E-Commerce Platform (In Progress) | [Code](#)
Django, Django REST Framework,JWT,
- Developed Users, Products, and Orders apps for a role-based e-commerce system.
- Implemented nested routing for product details (/product/12) and basic product cart functionality.
- Built APIs for adding products to cart and placing orders (**currently 50% completed**).
- Gained experience in RESTful API design, database modeling, and backend integration.Gained experience in RESTful API design, database modeling, and backend integration.

EDUCATION

Diploma in Computer Science and Technology   *2021 - Present*
Feni Polytechnic Institute

SKILLS

Languages	C, C++, Python, JavaScript, HTML, CSS
Tools/Frameworks	Django, Django REST Framework (DRF), React (familiar), Tailwind CSS
Databases	MySQL , SQLite, PostgreSQL (familiar)
Other Skills	REST API development, Git & GitHub, Basic Data Structures & Algorithms

CERTIFICATES

CS Fundamentals With Phitron: Spring 2024
Issued by: Phitron
